

Dear Vaughn Elementary Parent,

Our entire team hopes that this message finds everyone in the Vaughn community safe and healthy. We wanted to reach out to let you know about the plan for the next couple of weeks for elementary students regarding school work, teacher check-ins, and other areas.

First of all, in order to keep our students' minds engaged during this time we provided a packet with some work that could be done along with information regarding our technology options for students. Since we now know this will be a longer break than originally planned we realize that students will need more resources. **Therefore, we will be making an additional packet of work available for pick-up at our food distribution times at Pandaland and G3 this Thursday 3/26 and Friday 3/27 between 11:00a.m. and 1:00p.m. You can pick up all grade levels PK-5 at either site.** The materials in the packets will be shared online as well through Google Classroom and on our Vaughn website under the Covid-19 tab. Please feel free to engage in whichever method works best for your family.

Our Vaughn teachers have been greatly missing their students and many of them have been working on connecting with each student and their families during these past two weeks. **Our teachers will continue to reach out to communicate and check-in to make sure students and families feel supported during this time. We ask that you do communicate with your child's teacher in whichever manner works best for you.** Many teachers have been reaching out through ClassDojo, google classroom, or through email and phone calls.

Our school **Spring Break is scheduled to begin on Friday April 3 through April 10** and this will be a time when the Vaughn staff will be taking a break as well and therefore you will not have communication from us at this time.

As a school we are making plans for what learning looks like in the weeks following Spring Break. We are working to determine which families would need technology devices in order to be able to engage in learning using online resources. **If you haven't had an opportunity to complete our Technology Device Survey please do so as soon as possible.** This will help us plan for device distribution. You can either go to <https://tinyurl.com/vaughntechsurvey> or you can scan the QR Code below.

Sincerely,

Sadie Edemann
Director of Elementary Instruction
